Object: Search for a summer internship

Dear Sir or Madam,

Currently, I am a student enrolled in the first year of engineering (Software development) at the higher institute of computer science (ISI Ariana). I wish at the end of this year to get a summer internship in order to implement my theoretical learning.

About my study experience, I already had my Bachelor's degree in Computer systems and softwares in Higher Institute of Computer Science of Mahdia (ISIMA) during the period between 2017 and 2020 as a major of promotion.

I have experience in web and mobile development during the summer internship period at Vacpa Boudjbel in July 2019 as well as experience within Manarate R&D as a welcoming company during the end of internship period studies. So I have projects, certificates and skills like Laravel, vueJs mentioned in detail in my CV. I would also give you my experience as a host of a sports program at Naranj web radio after training provided by the French institute and France 24.

In the end, I'm a self-reliant person and I feel comfortable with teamwork. I would like to have my summer internship with you in Machinestalk.

Best regards.
